

Patient Database

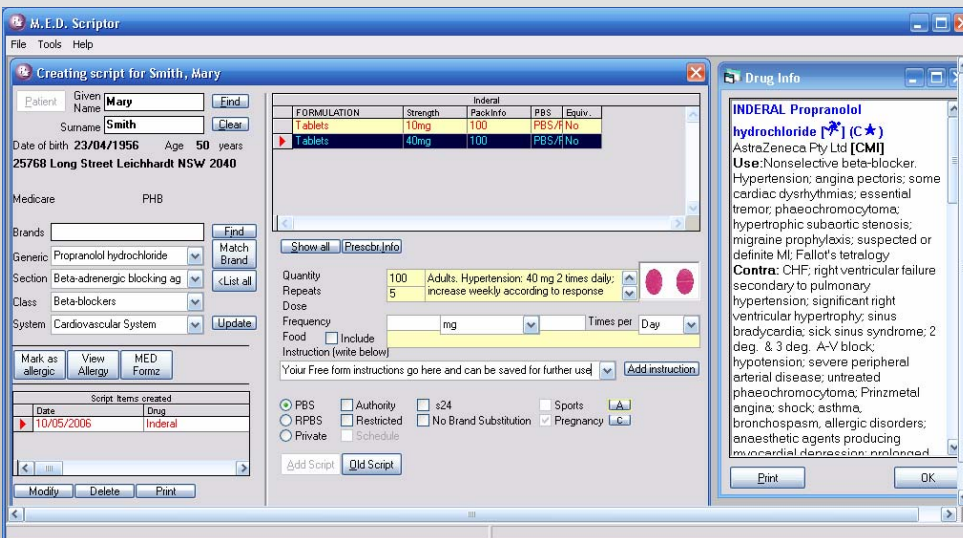

Accounting Module

Clinical Record

### Key MED O&R Features:

- **Order tests & upload Result files** in industry-standard PIT format, directly linked & automatically filed into patient records.
- **Quick.** Select a patient in Waiting Rooms / WorkList\* or MED Formz\* & view their results with one click
- **Easy.** Simply create new requests for both pathology or diagnostic imaging tests.
- **Versatile.** Works with encrypted and unencrypted text files, prints to plain or pre-formatted paper.
- **Comprehensive.** Include results with your correspondence
- **Ready Expansion & Updating** to full records & integration with all other MED Modules, including MED CustomDB\*.
- **MED products save time, space & money**— user friendly & adaptable to your practice needs.

↑ Screenshot of creating a script in MED Scriptor.

### Key MED Scriptor Features:

- **Full-featured Electronic Prescription Writing Program.** Keeps prescription history for each patient.
- **Save time copying or retyping.** Links to the patient database, saving you from double-entering patient details.
- **Quick.** NHS, Authority & private prescriptions or create your own instructions or repeat past scripts with a single click.
- **Helpful.** Drug information and interactions are displayed on screen automatically when a drug is chosen & at a mouse-click you can also match drug brands by their generic equivalents.
- **Versatile.** Print your prescriptions onto pre-formatted NHS paper or plain paper for private prescriptions
- **Customisable.** Window sizes and positions can be reset to your screen desires and are remembered between openings
- **Authoritative.** Uses MIMS\*\*\* Pharmaceutical Database — subscription required.

## Why should you choose MED O&R & Scriptor?

- **Very easy to use** with intuitive and user friendly graphical interface
- Keep **excellent records** of your patient's tests, results and prescriptions electronically
- Retrieve clinical information **quickly, easily and reliably** whenever you need it
- **Save time, space and cost** through automated and simplified processes
- Move forward into **paperless office** era with complete & integrated MED Software
- Developed by a **medical doctor** & a **practice manager** that understand your needs
- Join the **hundreds** of satisfied MED Users and contribute towards **future developments** of MED Software through **feature requests** and **MED User Meetings**
- **Up-to-date** drug information with MIMS electronic database subscription

Patient Database

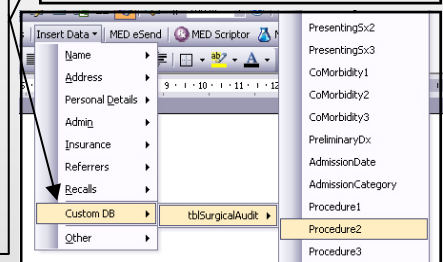

Accounting Module

Clinical Record

↑ Customised view of a surgical audit database.

- Patient demographics & referrer's details are **retrieved centrally** from MED PMI or MED Billing.
- No more **double-entry** and **inaccurate data** due to typing errors. Save time, reduce cost and simplify the process.

- Use the default database or **customise** it to your own style and needs
- All data entered in this database can be inserted, used and displayed in **MED Formz\*** letters, forms, reports or any kinds of documents

↑ Easily insert and display your CustomDB data in MED Formz documents.

### Key MED Custom DB Features:

- **MED solution designed to save time, space & money**— user friendly & adaptable to your practice needs.
- **Streamline your auditing tasks.** No more need to double-enter your patient details.
- **Customisable database.** Freely create your own clinical, surgical or any other database, using our underlying engine— the industry standard Microsoft® Access®.
- **Automatically displays linked patient referrers or care providers**— Comes readily linked to your MED PMI\* database.
- **Two-way links.**
  - ✓ Any fields from your MED CustomDB can be linked to display in your MED Formz\* templates & documents
  - ✓ When a patient is selected in Formz\* or your WorkList\* (your operation list), selecting CustomDB brings up your clinical audit page for that patient— the links are made for you— just fill in the blank spaces.
- **Perform powerful Search & Sort operations on your own data**—
  - ✓ Create your own searches from scratch, or
  - ✓ Modify already existing ones to your own individual needs
- If desired, **have your secretaries enter details directly from your dictation.**

- **Clinical Excellence.** The Database included represents the **basis of a good surgical Audit** with easy **one-click pop-ups** to choose:
  - ✓ Presenting Symptoms
  - ✓ Co-morbidity
  - ✓ Hospitals (from MED PMI\* or MED Billing\*)
  - ✓ Assistant Surgeons
  - ✓ Anesthetists
  - ✓ Procedures
  - ✓ Admission Categories
  - ✓ Complications
  - ✓ Return to ICU
  - ✓ Modify or Create your pop-up selections,
  - ✓ Change or add existing data fields or Layouts in your own Linked CustomDB
- **Reports.** Record wound infection risk, sentinel & adverse events .Have you custom data link straight into you MED Formz Templates.
- **Hospital Lists** are automatically obtained from MED Billing\*.
- **Security.** No special development password is required to customize you database. However, fierce password security is available using the powerful Microsoft® Access® engine once you are ready.
- **Ready Expansion & Updating** to full records & integration with all other MED Modules.

## Why should you choose MED CustomDB (Surgical Audit)?

- Ready-to-use surgical audit database complying with **clinical excellence**
- High degree of **customisability** and **flexibility** to suit your needs—either do-it-yourself or have JAM customise it for you
- **Integrated** with other MED modules to provide a seamless, synchronised and complete solution for your patient database, waiting rooms / operation list, billing and patient clinical record modules
